

NON-WOVEN LAMINATE GEOMEMBRANES

ArmorPad™ 3NWL and 3NWLD are lightweight woven coated geomembranes with a single or double non-woven laminated layer, which provide a strong and reliable barrier to water, other fluids and industrial contaminants. The non-woven laminated layer reduces slip occurrence on the top surface and improves puncture resistance on the bottom surface.

FEATURES & BENEFITS

- Lighter weight for more cost effective transportation
- Wider lengths which mean fewer field seams
- Can be factory prefabricated for faster and easier installations
- Added strength for puncture and tear resistance
- Engineered coatings provide exceptional hydrostatic resistance and heat seaming weldability
- Technologically designed for UV resistance
