TANDEM™ BAGGING SYSTEM

COST-SAVING SOLUTION TO TRADITIONAL PRE-OPENED BAGS ON A ROLL

IPG®'s Tandem™ works directly with existing bagging equipment, The Tandem™ perforates and opens Tandem™ Film on a roll. The pre-opened bag enters the bagging machine exactly like film from the current supplier. The patent-pending Tandem™ will match the speed of any bagging machine.

Tandem™ Films offer superior strength, clarity, and performance. Tandem™ Film rolls are often 2x, 3x, or 4x longer than those from the current supplier. This reduces roll changeover time, improves production efficiencies, and reduces inventory space.

BENEFITS

- Increase Production Efficiency
- Reduce Roll Changeover Time
- Reduce Inventory Space
- Lower Material Costs
- Eliminate Time and Costs to Dispose of Corrugated Side Guides From Current Supplier
- Splice-Free Material – Eliminates Jams and Waste

TECHNICAL DATA

ELECTRICAL	AIR	BAG WIDTH	BAG LENGTH	THICKNESS	WEIGHT
110V	1 CFM / 80 PSI clean dry air	3" to 11"	3" to unlimited	1.0 mil to 4.0 mil	90 lbs
